

## Online assessment in primary schools in Ireland: One decade ends, another begins

*Jude Cosgrove*

*(with Jean-Philippe Rivière (Wiquid), Aidan Clerkin, Adrian O'Flaherty  
and Gerry Shiel (ERC))*

FLIP meeting, 6-7 June 2019, Roma

# Overview

- ▶ Online assessment in national policy context of standardised testing
- ▶ Standardised testing at primary level - recent developments
- ▶ Overview of ERC's Drumcondra Online Testing System (DOTS)
- ▶ Challenges
- ▶ Potential solutions
- ▶ Questions, comments, experiences of other countries

# National context: the past decade

- ▶ PISA 2009 - attracted considerable media attention and commentary in Ireland. Reading -38 points, maths -16 points, science no change

*Irish Times*: '**shattering the myth** of a world-class education system' (December 8, 2010)

*Irish Independent* commented: '[T]here was **shock** last year when it emerged there was a fall in reading and maths scores for Irish students in the PISA' (April 3, 2012).

*Education Matters* described the results as 'an **urgent** call to action' (December 14, 2010)

[Recent research demonstrates issues with modelling missingness but that's an aside!... See Sachse, Mahler & Pohl, 2019: *When Nonresponse Mechanisms Change: Effects on Trends and Group Comparisons in International Large-Scale Assessments*

<https://journals.sagepub.com/doi/abs/10.1177/0013164419829196>].

# National context

- ▶ (part of) Policy response to PISA 2009: *National Strategy to Improve Literacy and Numeracy among Children and Young People (2011-2020)*  
[https://www.education.ie/en/Publications/Policy-Reports/lit\\_num\\_strategy\\_full.pdf](https://www.education.ie/en/Publications/Policy-Reports/lit_num_strategy_full.pdf)

Includes a range of actions and targets, some linked to PISA, e.g., one target is to:

Increase the percentage of 15-year old students performing at or above Level 4 (i.e. at the highest levels) in PISA reading literacy and numeracy tests by at least 5 percentage points by 2020

- ▶ Also includes a range of actions concerning assessment. With respect to standardised tests schools must:

Collect aggregated data on student achievement on standardised assessment tests in English reading and mathematics in all primary schools and in Irish reading in all Irish-medium primary schools at the end of second class, fourth class and sixth class.

# National context

- ▶ The mandatory administration of standardised tests arising from the national literacy and numeracy strategy has had multiple impacts on the culture of assessment:

Decision to use test results as one criterion in determining the allocation of special educational teaching resources to schools could be interpreted as a move towards a higher-stakes model

See O'Leary, M. et al. (2019, May): *Standardised Testing in English Reading and Mathematics in the Irish Primary School: A Survey of Irish Primary Teachers*

[https://www.dcu.ie/sites/default/files/carpe/carpeinto\\_standardised\\_testing\\_survey\\_may27\\_pdf.pdf](https://www.dcu.ie/sites/default/files/carpe/carpeinto_standardised_testing_survey_may27_pdf.pdf)

# National context

## ► Next steps...

ERC is one of the stakeholders (along with, e.g. NCCA and SEC – curriculum and state examinations bodies) to establish broad national strategy on assessment – due this autumn

Important exercise, given current fragmented landscape and complaints of initiative overload from teachers, pressures on student

**Main point:** assessment must be viewed in wider context and should be responsive to policy...!

# DOTS overview

- ▶ **Drumcondra Online Testing System** - tests and platform of the ERC
  - ▶ ERC and Mary Immaculate College both supply tests to the primary sector in Ireland
  - ▶ Schools receive grant aid to purchase tests and may choose to administer them on paper or online
  - ▶ At present, only ERC offers tests online (via DOTS)
  - ▶ Following standardisation, online tests available to primary schools for the first time in 2018-2019
  - ▶ This follows significant test redevelopment since the previous versions (2006-2007)
  - ▶ Also has online tests for 7<sup>th</sup> and 8<sup>th</sup> grade
  - ▶ All questions are MCQ
  - ▶ Paper - 2 parallel forms
  - ▶ Online - 3 parallel forms
  - ▶ Have national standard scores and %ile ranks

Grade level	Paper	DOTS
First	X	
Second	X	
Third	X	X
Fourth	X	X
Fifth	X	X
Sixth	X	X

# DOTS overview

- ▶ Fully integrated online tests system on which:

schools buy tests

teachers set up test sessions

students take tests

test administrators use *DOTS Monitor* to track students

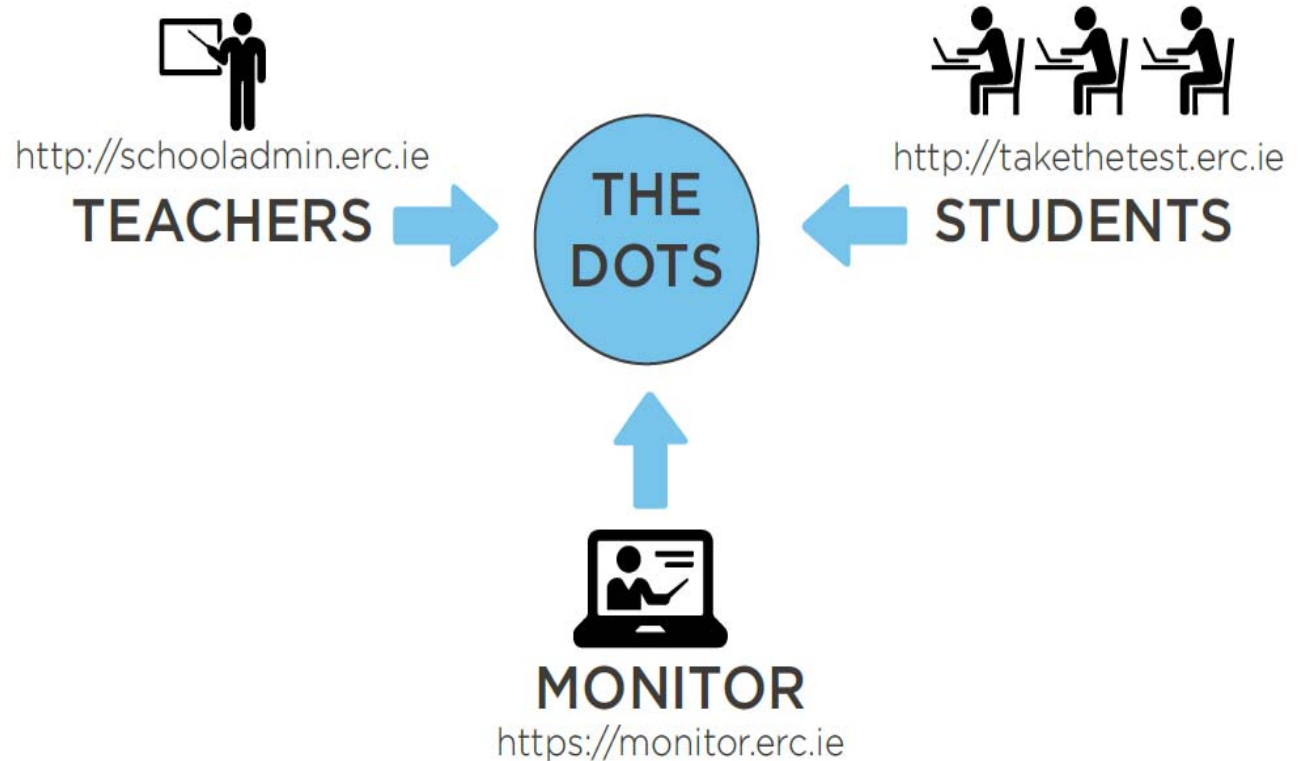

can see live progress for each student

includes Help/Pause/Resume functions

teachers access results and reports

[school training video](#)

## ACCESSING THE DOTS - DIFFERENT DOORS TO THE SAME SYSTEM

# Common features of all DOTS tests

- ▶ Two-tier login
  - ▶ Pupils log themselves in using individual password
  - ▶ When ready, administrator calls out a 4-digit group password
- ▶ Practice examples
- ▶ Built-in instructions to complement read-aloud script
- ▶ One question at a time on-screen
- ▶ Built-in timer and question tracker
- ▶ No forced answering
- ▶ At the end, can review all Qs or skipped Qs
- ▶ There is no escape function... No accidental finishing

# Common DOTS on-screen elements

Test type

Timer

Student name

Section Question

The screenshot shows a web browser window with the URL <https://takethetest.erc.ie/>. The page header includes a dark blue bar with 'DPPT-MATHS', a timer showing '60mins' with a clock icon, and a user profile for 'Annie Chance'. Below the header, there are tabs for 'IMAGES' and 'CALCULATOR', and buttons for 'INSTRUCTIONS' and 'GET HELP'. The main content area displays 'Section 2 of 4' and 'QUESTION 2 OF 12'. The question text is 'What is the size of angle Y in the diagram?'. Below the question are four radio button options: '60°', '70°', '120°', and '170°'. The '70°' option is selected. To the right of the question is a diagram of a triangle with an interior angle labeled 'Y'. A large yellow star is overlaid on the diagram. Annotations with blue arrows point to various elements: 'Test type' points to 'DPPT-MATHS'; 'Timer' points to the '60mins' timer; 'Student name' points to 'Annie Chance'; and 'Section Question' points to the question text and the radio button options.

Finish Section

# Ideal (full integrated) online assessment

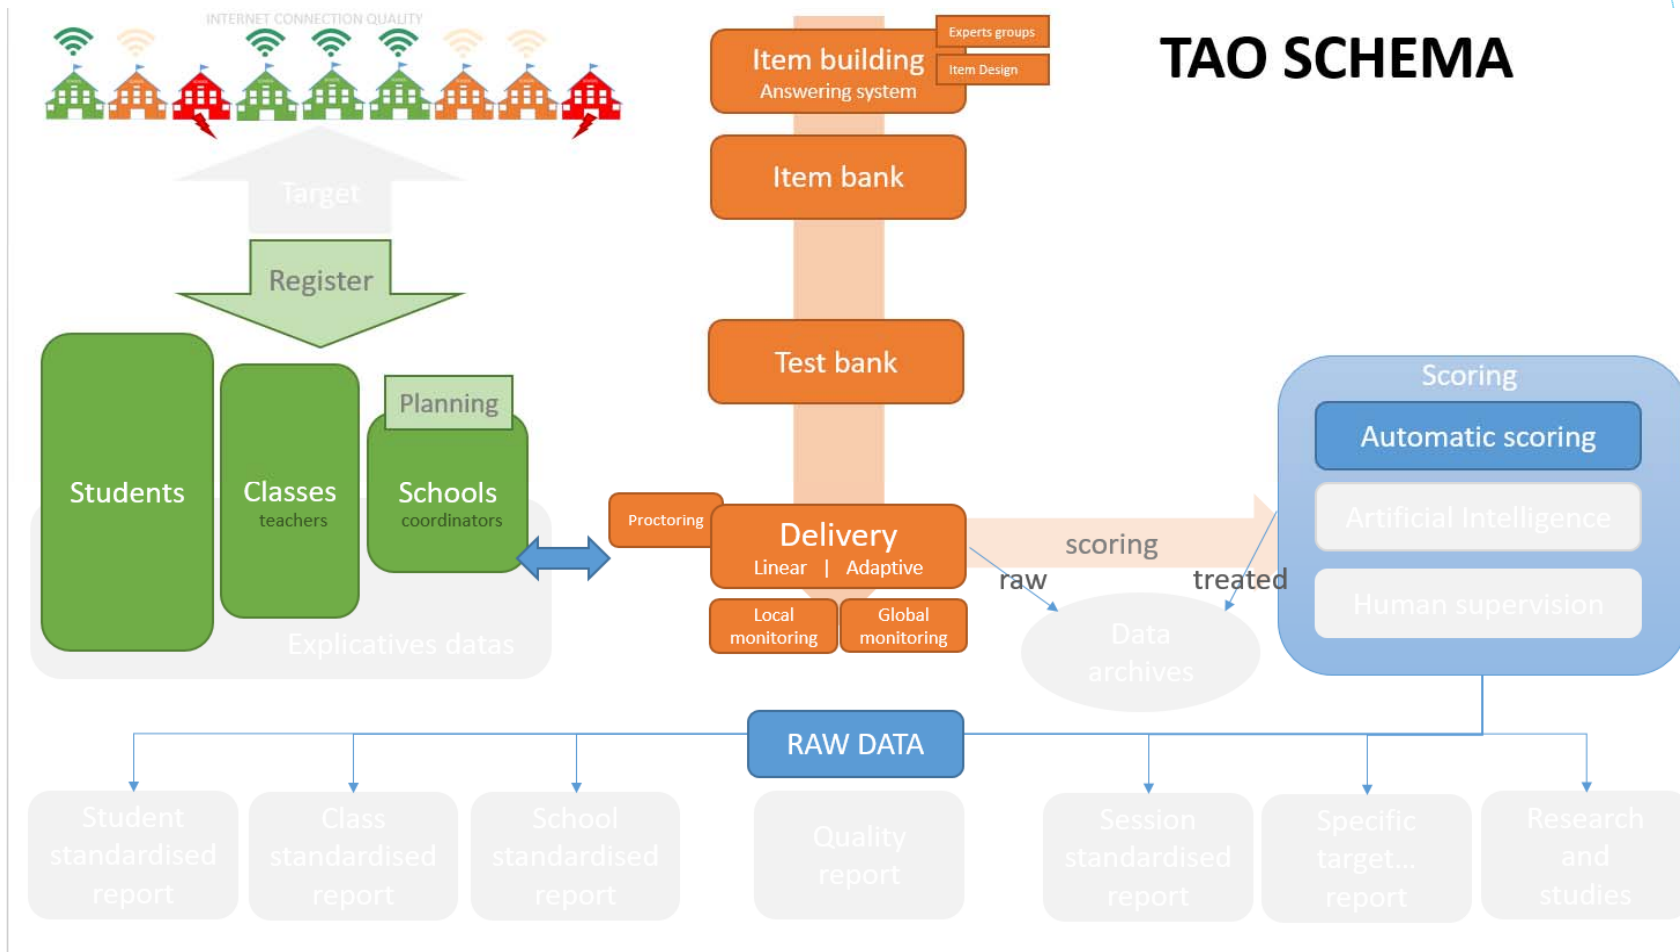

# DOTS

# TAO

# Moving from DOTS to TAO

- ▶ DOTS is based on a commercial model - timely to consider move to alternative non-commercial solution
- ▶ Working with Jean-Philippe Rivière, we have established that:
  - ▶ DOTS has several strengths, in particular
    - ▶ it is a fully integrated solution
    - ▶ the test-taker interface is good
  - ▶ However, there are difficulties associated with DOTS and a commercial model more generally...

# Moving from DOTS to TAO

- ▶ Vulnerabilities - fluctuations in test sales and policy u-turns or sudden changes
  - ▶ already experienced
- ▶ Single instance of DOTS - lack of possibility to develop and test in tandem
- ▶ JavaScript library results in rigid structure - not add-on friendly - and there are some issues with back-office user interface
- ▶ No facility for fast and tailored communications with schools
- ▶ No straightforward way to extend item types, e.g. text response and text response coding extension
- ▶ Lack of access to code - sub-optimal management
- ▶ Also: many advantages of open source solution, not least the existence of an international TAO community

# Potential solutions

- ▶ Again, working with Jean-Philippe Rivière, we have established that:
- ▶ TAO out of the box provides about 80% of the solution
- ▶ Involves building or finding solutions that are **focused on decoupling of structure and content**, e.g. via TAO extensions for:
  - ▶ Migration of test content (solution already identified via CSS)
  - ▶ School portal (DEPP?)
  - ▶ Payment system (is Ireland unusual in this?)
  - ▶ Reporting function (DEPP?)
  - ▶ (and ideally) Text response coding function (INVALSI?)

# Questions for FLIP participants

- ▶ Have other countries had experience of moving from a commercial to TAO or other open source online assessment platform? What are the key learning points?
- ▶ Do any other countries ask schools for payment for tests?
- ▶ Do any other countries have or need TAO-friendly solutions for the following:
  - ▶ School portal
  - ▶ Payment system
  - ▶ Reporting function
  - ▶ Text response coding function

# Thank you
